

Locati Architects

Project Architect / Manager and CAD Technician Position

Locati Architects is offering the opportunity to collaborate in a team environment on exceptional projects and with exciting clientele. We have expanded our offices with an open design studio adding to the collaborative setting. We are a leading regional residential and commercial design firm with projects throughout the US and Canada. Our project architects' and drafters' responsibilities are a mix of functional/technical activities, listening, problem-solving and creativity. AIA registration or drafting degrees are not required, although a strong work ethic, self-motivation and willingness to be a part of a team are.
