...is seeking a
Project Architect
to join our Team in Bozeman, MT

Live and work in the best place in the state referred to as “The Last Best Place”. Cultural offerings include theater, arts, music, museums, not to mention the educational highlights through Montana State University. These are balanced out with the abundance of outdoor and recreational activities that the Big Sky state has to offer: skiing, mountain biking, hiking, and world class fishing. Here work-life balance is the opportunity to work hard and play hard. This position is full time Monday thru Friday. If you are exploring a new opportunity in your career, we welcome the chance to review your cover letter, resume and portfolio. Please submit to julee@brechbuhlerarchitects.com

OUR NEEDS
Ability to meet with clients, identify their lifestyle, needs and design preferences; and then incorporating them into a design defining their dream home.

Perform the required mix of design and administrative duties encompassing all phases of the architectural design process.

Meeting budgets and timelines while ensuring the works meet required architectural standards, building codes, guidelines, and regulations.

Developing status reports after visiting the project sites. Communicating and cooperating with the Build Team and construction professionals.

Staying up-to-date on the latest architectural trends and technologic advancements related to cutting edge home design.

YOU CONTRIBUTE
To continue delivering the high-quality design and customer service Brechbuhler Architects is known for. It is imperative that you have a Bachelor or Masters of Architecture.

Providing us with your extensive architectural work experience in residential and construction documentation creation is essential. We request a strong portfolio showcasing your drawing skills and familiarity with REVIT and AutoCAD. Experience with Adobe Photoshop, Lightroom, Lumion is very beneficial.

A strong imagination, ability to think in three dimensions (while outside the box), expert knowledge of building products, construction details and excellent organizational skills are important qualities and, of course, outstanding written and oral communication abilities.
